

GreenSky Wealth 40-85% November 2018

Portfolio Objective

GreenSky Wealth Model Portfolios are diversified investment portfolios designed to provide long term returns. They maintain a global investment outlook over multi asset classes in order to provide long term growth in capital and income, and are risk weighted according client requirements. The aim is to achieve superior absolute returns through the application of traditional, fundamental and value investment principles.

GreenSky Wealth Ltd. is an independent, portfolio management and financial advisory group, established in December 2009 and majority owned by its directors and employees.

Portfolio Commentary

The volatility seen in October continued into November, with trade tensions, interest rates, Brexit and the Italian budget featuring high on market influences, a plunging Oil price also added to concerns. However, Fed Chair Powell's comments that US interest rates are only just below neutral encouraged a late month rally. The portfolio enjoyed a 1.00% increase outperforming it's benchmark.

Cumulative Performance Since Inception

5th December 2012

+ 82.19%	GreenSky 40-85%
+ 50.36%	UT Mixed Investment 40-85% shares

Source: Financial Express (Using bid to bid market value, total return, as at 30th November 2018)

Past performance is not a guide to future performance. The value of investments and the income from them may go down as well as up and investors may not get back the full amount of their original investment.
